DETAILED ACTION

Response to Amendment

1. This Office action is in response to applicant's communication filed on November 9, 2006 in response to PTO office action mailed August 18, 2006. The applicant's remarks with respect to claims were considered with the results that follow.
2. In response to last office action, no claims have been amended, added or canceled. As a result, claims 1-29 remain pending in this application.

Response to Arguments

3. Applicant's arguments, see remarks, pages 11-12, filed November 09, 2006, with respect to the rejection(s) of claim(s) 1, 15 and 29 under 35 U.S.C. § 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of co-pending application 10/637168.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 2188

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-29 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1-27 of copending Application No.10/637168. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims only differ in instructions as "load" and "store" and it would have been obvious to one having ordinary skill in the art at the time of the invention to use monitored store instruction instead of load instruction of copending application 10/637168 to monitor for speculative transaction.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
